

EU Machinery Directive compliant guard design; fasteners remain attached to guards when removed from blower (cannot be dropped/ lost).

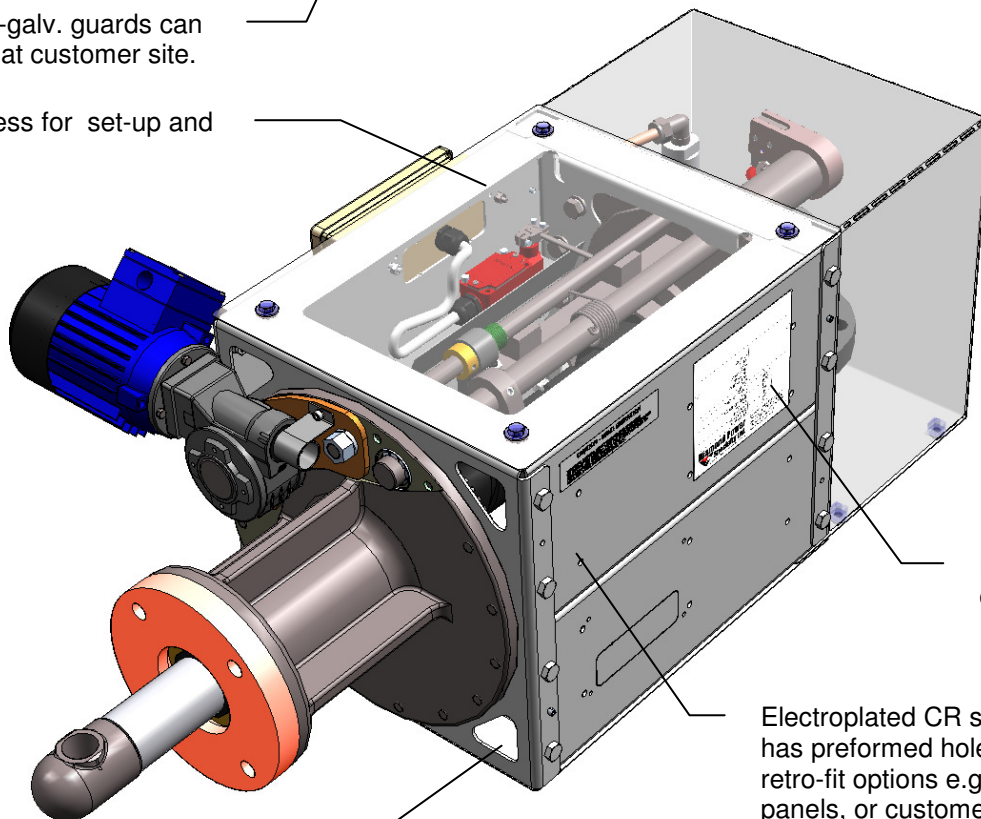

Fully interchangeable with IR2G - identical operating parts. New body has short manufacturing lead times.

Standard DPSL terminal box options (ref.to drawing 398348-0140)

Flat-pack, pre-galv. guards can be retro-fitted at customer site.

Improved access for set-up and maintenance.

Blower EU certified -
 CE

Electroplated CR steel body has preformed holes to accept retro-fit options e.g. acoustic panels, or customer brackets.

Lifting hook slots at every corner. Easy stack body shape.

Hot dip galvanized body option for harsh environments.
