

The hidden cost of sootblower maintenance can add thousands of dollars to annual operations costs. Problems, such as poor quality weld joints, improper nozzle selections, and inferior materials of construction, can often lead to premature failure.

As a continued service to our customers, Diamond Power offers a complete line of tubular replacements including lance tubes, feed tubes, rotary multi-jet elements, and wall blower swivel tubes for all sootblower models.

Diamond Power tubular products are backed by nearly 100 years of experience in boiler cleaning applications and technological advancement. Our goal is to furnish tubular goods that perform better, reduce your operating costs, and fill your needs quickly and responsively in the manner that Diamond Power customers have come to appreciate.

Our engineers are available to discuss any boiler cleaning issue you have either by phone or at your facility. You can e-mail us at [dpimktg@pgg.mcdermott.com](mailto:dpimktg@pgg.mcdermott.com). We pride ourselves in solving issues that result in clear bottom line improvements to our customers.

**Call us today and put our excellence in engineering, quality, and customer service to work for you today.**
