

# IK1M-TE Sootblower

IK1M TE. Stroke up to 1.8meters cleaning 12 meters total length. Partially retractable soot blower integrated with a traveling motor, which by means of a reduction gear and a lead screw, translates the carriage that supports the cleaning element. A lance tube, attached to the carriage, pushes a cleaning element past the tubes.

## USED IN:

- Back-end section of coal- or oil-fired boilers
- Economiser
- Air preheaters
- Fluidized bed
- Exhaust heat recovery boiler
- HRSG
- Biomass boiler
